Subject Index of volume 55

Absorption
molecular structure effects on the lasing properties of rhodamines, 97
Absorption spectra
a study of the ClO absorption cross-section between 240 and 310 nm and the kinetics of the self-reaction at 300 K, 1
Alcohols
sensitized photo-oxidations of dissolved alcohols in homogeneous and heterogeneous systems. Part 1. Homogeneous photosensitization by uranyl ions, 219
Amines
study of chemical induced dynamic nuclear polarization field dependencies in the photoreduction of quinones by amines, 43

Benzil
study of the magnetic-field-dependent behaviour of radicals generated photochemically from benzil in micellar media, 197
the photoreaction between benzil and stilbene: a re-investigation by gas chromatography–mass spectrometry, 87
Biphenyls
the reaction of biphenyls in the upper triplet states in micellar systems, 377
1,4-Bis(heteroaryl)-1,3-butadiynes
emission studies of 1,4-bis(heteroaryl)-1,3-butadiynes, 71

Carbonyls
sensitized photo-oxidations of dissolved alcohols in homogeneous and heterogeneous systems. Part 1. Homogeneous photosensitization by uranyl ions, 219
Catechol
kinetic studies in heterogeneous photocatalysis. 4. The photomineralization of a hydroquinone and a catechol, 243
Chemiluminescence
chemiluminescence and mechanism of the reactions in the (Eu(II)–Eu(III))–deoxyribonucleic acid–H202 system, 63
Chlorine
fluorescence from photo-dissociation of OClO at 123.6 nm, 269
Chromophores
a three-dimensional extended dipole model for interaction and alignment of chromophores in monolayer assemblies, 187
ClO
a study of the ClO absorption cross-section between 240 and 310 nm and the kinetics of the self-reaction at 300 K, 1
Cobalt
fluorescence quenching of perylene by Co^{2+} ions via energy transfer in viscous and non-viscous media, 53
Collisional quenching
collisional quenching of excited FSO_3 radicals produced by laser photodissociation of $F_2S_2O_6$ at 193 nm, 135
the collisional quenching of I ($5^2P_{1/2}$) by the molecules H_2O, CH_3OH, C_2H_5OH, HCOOH and CH_3COOH by time-resolved emission ($I(5^2P_{1/2}) \rightarrow I(5^2P_{3/2}) + h\nu$, $\lambda = 1.315$ μm) following pulsed-laser photolysis, 275
Cyanide
photosensitized CN^- oxidation over TiO_2, 251
Cyclohexylcyclopentylmethyl radicals
isomerization of excited cyclohexyl,1-hexen-6-yl and cyclopentylmethyl radicals, 25

Dichloromethane
role of dichloromethane in the photocyclization–oxidation of vinylheterocyclic systems, 347
Diethyloxalate
photoaddition of furil and diethyloxalate to electron-rich olefins, 339

Elsevier Sequoia/Printed in The Netherlands

Dihydrophenanthrene
mechanism of the amine-promoted photochemical 1,3-H shift of 1,2- and 3,4-dihydrophenanthrene into 1,4-dihydrophenanthrene, 169
Dipole model
a three-dimensional extended dipole model for interaction and alignment of chromophores in monolayer assemblies, 187
Dynamic nuclear polarization
study of chemical induced dynamic nuclear polarization field dependencies in the photoreduction of quinones by amines, 43

Electron transfer
effect of veisicular interfacial potential of electron transfer between *N,N,N',N'*-tetramethylbenzidine and quinones, 209
excited states of electron donor–acceptor complexes between aromatic amines and brominated organic compounds in solid polymers, 105
Emission spectra
fluorescence quantum yield evaluation of strongly absorbing dye solutions as a function of the excitation wavelength, 361
(Eu(II)–Eu(III)–deoxyribonucleic acid
chemiluminescence and mechanism of the reactions in the (Eu(II)–Eu(III))–deoxyribonucleic acid–H202 system, 63
Exciplexes
a molecular orbital study of exciplex structure, 145
Excitation
study of the magnetic-field-dependent behaviour of radicals generated photochemically from benzil in micellar media, 197

Fluorescence
emission studies of 1,4-bis(heteroaryl)-1,3-butadiynes, 71
fluorescence from photo-dissociation of OClO at 123.6 nm, 269
fluorescence quantum yield evaluation of strongly absorbing dye solutions as a function of the excitation wavelength, 361
molecular structure effects on the lasing properties of rhodamines, 97
temperature dependence of fluorescence from polymer-bound 2-(2'-hydroxyphenyl)-2H-benzotriazole photostabilizers, 387
Fluorescence quenching
fluorescence quenching of perylene by Co^{2+} ions via energy transfer in viscous and non-viscous media, 53
Furfuryl alcohol
analytical and kinetic study of the phototransformation of furfuryl alcohol in aqueous ZnO suspensions, 127
Furil
photoaddition of furil and diethyloxalate to electron-rich olefins, 339

1-Hexen-6-yl radicals
isomerization of excited cyclohexyl,1-hexen-6-yl and cyclopentylmethyl radicals, 25
Hydrogen peroxide
photocatalytic oxidation of phenol in the presence of hydrogen peroxide and titanium dioxide powders, 115
Hydroquinone
kinetic studies in heterogeneous photocatalysis. 4. The photomineralization of a hydroquinone and a catechol, 243

Iodine
the collisional quenching of $I(5^2P_{1/2})$ by the molecules H_2O, CH_3OH, C_2H_5OH, HCOOH and CH_3COOH by time-resolved emission ($I(5^2P_{1/2}) \rightarrow I(5^2P_{3/2}) + h\nu$, $\lambda = 1.315$ μm) following pulsed-laser photolysis, 275
Isomerization
isomerization of excited cyclohexyl,1-hexen-6-yl and cyclopentylmethyl radicals, 25

Laser flash photolysis
a laser flash photolysis study of the reduction of methyl viologen by conduction band electrons of TiO_2 and Fe–Ti oxide photocatalysts, 319
Laser photodissociation
collisional quenching of excited FSO_3 radicals produced by laser photodissociation of $F_2S_2O_6$ at 193 nm, 135

Laser photolysis
excited states of electron donor–acceptor complexes between aromatic amines and brominated organic compounds in solid polymers, 105
laser photolytic and low temperature investigations of naphthoquinone diazides in Novolak films, 259
Luminescence
luminescence spectra and lifetimes of tris-(2,2′-bipyridine)ruthenium(II) dichloride and potassium hexacyanochromate(III) in polymer films and hydrocarbon mulls at approximately 77 K: evaluation of alternative host media for studying unstable species in photochemical reaction pathways originating from non-volatile substrates, 301
luminescence study of 4-phenylpyridine, 323
Luminescence quenching
tris(2,2′-bipyridine)ruthenium(II) ion-sensitized photodechlorination of polychlorophenolate ions, 233

Magnetic field effect
study of the magnetic-field-dependent behaviour of radicals generated photochemically from benzil in micellar media, 197
Methyl viologen
a laser flash photolysis study of the reduction of methyl viologen by conduction band electrons of TiO_2 and Fe–Ti oxide photocatalysts, 319
Molecular orbital study
a molecular orbital study of exciplex structure, 145

N,*N*,*N*′,*N*-tetramethylbenzidines
effect of veisicular interfacial potential on electron transfer between *N*,*N*,*N*′,*N*′-tetramethylbenzidine and quinones, 209
Naphthoquinone diazides
laser photolytic and low temperature investigations of naphthoquinone diazides in Novolak films, 259

o-nitrobenzylesters
investigation of the photo-rearrangement of *o*-nitrogen-zylesters by time-resolved resonance Raman spectroscopy, 329

Octacyanotungstate(V)
a two-quantum process in the photochemistry of the octacyanotungstate(V) ion in aqueous solution, 283

4-Phenylpyridine
luminescence study of 4-phenylpyridine, 323
Perylene
fluorescence quenching of perylene by Co^{2+} ions via energy transfer in viscous and non-viscous media, 53
Phenol
photocatalytic oxidation of phenol in the presence of hydrogen peroxide and titanium dioxide powders, 115
Photo-isomerization
T1 potential energy curves and "one-way" photo-isomerization of styryl aromatics, 37
Photo-oxidation
photosensitized CN^- oxidation over TiO_2, 251
Photoaddition
photoaddition of furil and diethyloxalate to electron-rich olefins, 339
Photocatalysis
analytical and kinetic study of the phototransformation of furfuryl alcohol in aqueous ZnO suspensions, 127
kinetic studies in heterogeneous photocatalysis. 4. The photomineralization of a hydroquinone and a catechol, 243
photocatalytic oxidation of phenol in the presence of hydrogen peroxide and titanium dioxide powders, 115
Photodissociation
fluorescence from photo-dissociation of OClO at 123.6 nm, 269
Photoexcitation
the reaction of biphenyls in the upper triplet states in micellar systems, 377
Photolysis
a two-quantum process in the photochemistry of the octacyanotungstate(V) ion in aqueous solution, 283
hydrogen production in the photolysis of tetrahydroxostannate(II) ions in an aqueous medium, 297
the photolysis of potassium peroxodisulphate in aqueous solution in the presence of tert-butanol: a simple actinometer for 254 nm radiation, 157

Photomineralization
kinetic studies in heterogeneous photocatalysis. 4. The photomineralization of a hydroquinone and a catechol, 243
Photoreaction
the photoreaction between benzil and stilbene: a re-investigations by gas chromatography–mass spectrometry, 87
Photoreduction
study of chemical induced dynamic nuclear polarization field dependencies in the photoreduction of quinones by amines, 43
Photosensitized oxidation
sensitized photo-oxidations of dissolved alcohols in homogeneous and heterogeneous systems. Part 1. Homogeneous photosensitization by uranyl ions, 219
Photostabilizers
temperature dependence of fluorescence from polymer-bound 2-(2′-hydroxyphenyl)-2H-benzotriazole photostabilizers, 387
Phototransformation
analytical and kinetic study of the phototransformation of furfuryl alcohol in aqueous ZnO suspensions, 127
Poly(vinyl chloride)
excited states of electron donor–acceptor complexes between aromatic amines and brominated organic compounds in solid polymers, 105
Polychlorophenols
tris(2,2′-bipyridine)ruthenium(II) ion-sensitized photodechlorination of polychlorophenolate ions, 233
Potassium hexacyanochromate(III)
luminescence spectra and lifetimes of tris-(2,2′-bipyridine)ruthenium(II) dichloride and potassium hexacyanochromate(III) in polymer films and hydrocarbon mulls at approximately 77 K: evaluation of alternative host media for studying unstable species in photochemical reaction pathways originating from non-volatile substrates, 301
Potassium peroxodisulphate
the photolysis of potassium peroxodisulphate in aqueous solution in the presence of tert-butanol: a simple actinometer for 254 nm radiation, 157
Quantum yield
fluorescence quantum yield evaluation of strongly absorbing dye solutions as a function of the excitation wavelength, 361
Quinones
effect of veisicular interfacial potential on electron transfer between *N*,*N*,*N*′,*N*′-tetramethylbenzidine and quinones, 209
study of chemical induced dynamic nuclear polarization field dependencies in the photoreduction of quinones by amines, 43

Raman spectroscopy
investigation of the photo-rearrangement of *o*-nitrobenzylesters by time-resolved resonance Raman spectroscopy, 329
Reaction kinetics
a study of the ClO absorption cross-section between 240 and 310 nm and the kinetics of the self-reaction at 300 K, 1
Rhodamines
molecular structure effects on the lasing properties of rhodamines, 97

Stillbene
the photoreaction between benzil and stilbene: a re-investigation by gas chromatography–mass spectrometry, 87
Styryl aromatics
T1 potential energy curves and "one-way" photo-isomerization of styryl aromatics, 37

Tetrahydroxostannate(II)
hydrogen production in the photolysis of tetrahydroxostannate(II) ions in an aqueous medium, 297
Time-resolved emission
the collisional quenching of $I(5^2P_{1/2})$ by the molecules H_2O, CH_3OH, C_2H_5OH, HCOOH and CH_3COOH by time-resolved emission ($I(5^2P_{1/2}) \rightarrow I(5^2P_{3/2}) + h\nu$, $\lambda = 1.315$ μm) following pulsed-laser photolysis, 275
Time-resolved resonance
investigation of the photo-rearrangement of *o*-nitrobenzylesters by time-resolved resonance Raman spectroscopy, 329

Titanium dioxide
photocatalytic oxidation of phenol in the presence of hydrogen peroxide and titanium dioxide powders, 115
Tris-(2,2′-bipyridene)ruthenium(II)
tris(2,2′-bipyridine)ruthenium(II) ion-sensitized photodechlorination of polychlorophenolate ions, 233
luminescence spectra and lifetimes of tris-(2,2′-bipyridine)ruthenium(II) dichloride and potassium hexacyanochromate(III) in polymer films and hydrocarbon mulls at approximately 77 K: evaluation of alternative host media for studying unstable species in photochemical reaction pathways originating from non-volatile substrates, 301

Vinylheterocyclic systems
role of dichloromethane in the photocyclization–oxidation of vinylheterocyclic systems, 347
